Q8 Gade 220

Application
- Industrial gear and worm gear lubricant based on polyalkylene glycol

Specifications
- DIN 51517-3, CLP PG
- ISO 12925-1 CKE and CKT (ISO 6743-6)
- ANSI/AGMA 9005-E02

Benefits
- High thermal and oxidation stability
- Improved friction characteristics
- Very high viscosity index
- Good low temperature properties
- Excellent corrosion protection and demulsibility characteristics

References
- Q8 Gade is approved by David Brown
- Q8 Gade meets the requirements of SKF for use in Paper Machines

Caution
- Compatibility of Q8 Gade with mineral oils and poly alpha olefins is poor
- Q8 Gade can affect certain seals and paints
