

KONKRETON XS

GENERAL FEATURES:

Konkreton XS antiadhesive oil is made from deeply refined mineral oil with enriching additives, primarily anti-adhesive and anti-corrosive. Optimally balanced composition of the product ensures the integrity and continuity of oil film and protects concrete elements from sticking to the mould surface.

APPLICATION:

Konkreton XS antiadhesive oil is used for lubricating moulds used in the production of cellular concrete blocks or other concrete elements, where the increased thickness of the separation layer is required. In the case of dynamic filling of mould and /or bathtubs, there is a risk of washing out standard oils from moulds and sticking of concrete. Due to its proper composition and enriching additives used, Konkreton XS oil protects effectively against such effects. It can be applied using spray lubrication with automatic or manually operated devices.

PARAMETERS	UNIT	TYPICAL VALUES
Kinematic viscosity in 40°C	mm ² /s	152
Flash point	°C	215
Saponification value	mg KOH/g	5,8
Pour point	°C	-8

NOTE:

Physicochemical parameters listed in the table are typical values. Real values are stated in quality control certificates attached to each product lot.
