

GREASEN STP

GENERAL FEATURES:

GREASEN STP is a consistency class 1 calcium grease. It is based on a mineral oil with viscosity of 36-60 mm²/s at 50°C.

With its soft consistency, it can be used in greasing equipment such as grease guns. It is fairly resistant to cold water.

APPLICATION:

GREASEN STP Grease is intended exclusively for periodic lubrication of car chassis, pins, joints and guides in temperatures from -20°C up to +60°C.

GREASEN STP Grease is not suitable for lubricating rolling bearings and water pumps.

STANDARDS, APPROVALS. SPECIFICATION:

DIN 51 502: M1C-20
ISO 6743-9: BAEA-1

PARAMETERS	UNIT	TYPICAL VALUES
Penetration after kneading at 25°C	mm/10	330
Dropping point	°C	105
Effervescent components	%	Not present

NOTE:

Physicochemical parameters listed in the table are typical values. Real values are stated in quality control certificates attached to each product lot.
