

## NP 68 RECYCLE STOCK

### GENERAL FEATURES:

NP 68 recycle stock is manufactured basing on specially selected base oils and higher fatty acids and it is enriched with a set of additives

### APPLICATION:

NP 68 circulating stock is intended to lubricate low-temperature friction centres (up to 90 degrees), it is used in machining devices as a cooling and lubricating agent, in low loaded hydraulic systems requiring –HH oils. It also can be used for cleaning of industrial installations.

PARAMETERS	UNIT	TYPICAL VALUES
Kinematic viscosity at 40°C	mm <sup>2</sup> /s	65
Viscosity index	-	126
Flow temperature	°C	-22

**NOTE:**  
Physicochemical parameters listed in the table are typical values. Real values are stated in quality control certificates attached to each product lot.
