

Q8 Copper Thread

Description

Multi purpose anti-seize grease

Application

- Anti-seize grease for all types of threaded connections. It is suitable for use, as an anti-seize up to 1100°C, and will protect against seizure due to corrosion and chemical attack. Typical applications include pipe fittings and valves in the petrochemical industries and on drilling equipment.

Benefits

- Prevents seizure during assembly and reduces therefore assembly time
- Enables easy dismantling of components subjected to high temperatures
- Provides an effective anti-seize in saturated conditions, including chemical environments and salt water
- Enables fast and easy dismantling of parts, allowing them to be reused after dismantling

User Instructions

- Apply by brush to the threaded components prior to assembly. Ensure that both threaded surfaces are completely coated with grease.

Properties	Method	Unit	Typical
Soap type	-	-	Bentonite
Consistency, NLGI No.	-	-	1 / 2
Colour	Visual	-	Copper coloured
Four Ball, Weld Load	IP 239	kg	350
Penetration, Worked, 25 °C, 150 g, 5 s	D 217	0.1 mm	300
Dropping Point	D 2265	°C	>300

The figures above are not a specification. They are typical figures obtained within production tolerances.
