The mineral oils in the product contain < 3% DMSO extract (IP 346).

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

#### Туре

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

- [3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII
- [4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII
- [5] Substance of equivalent concern

Occupational exposure limits, if available, are listed in Section 8.

Q8 Halley 46

## **SECTION 4: First aid measures**

| 4.1 Description of first aid n | neasures   |
|--------------------------------|--|
| Eye contact                    | <ul> <li>Immediately flush eyes with plenty of water, occasionally lifting the upper and lower<br/>eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10<br/>minutes. Get medical attention.</li> </ul>  |
| Inhalation                     | : Remove victim to fresh air and keep at rest in a position comfortable for breathing.<br>Get medical attention if symptoms occur.   |
| Skin contact                   | : Wash skin thoroughly with soap and water or use recognized skin cleanser.<br>Remove contaminated clothing and shoes. Get medical attention if symptoms occur.<br>High pressure skin injections are serious medical emergencies. Injury will not<br>appear serious at first. Within a few hours, tissue will become swollen, discolored<br>and extremely painful. |
| Ingestion                      | : Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.                      |
| Protection of first-aiders     | : No action shall be taken involving any personal risk or without suitable training.   |

#### 4.2 Most important symptoms and effects, both acute and delayed

#### Potential acute health effects

| Eye contact               | : No known significant effects or critical hazards.   |
|---------------------------|---|
| Inhalation                | : No known significant effects or critical hazards.   |
| Skin contact              | : Defatting to the skin. May cause skin dryness and irritation.   |
| Ingestion                 | : No known significant effects or critical hazards.   |
| Over-exposure signs/sy    | <u>mptoms</u>   |
| Eye contact               | : No specific data.   |
| Inhalation                | : No specific data.   |
| Skin contact              | : Adverse symptoms may include the following:<br>irritation<br>dryness<br>cracking  |
| Ingestion                 | : No specific data.   |
| 4.3 Indication of any imm | ediate medical attention and special treatment needed   |
| Notes to physician        | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul> |
| Specific treatments       | : No specific treatment.  |

## **SECTION 5: Firefighting measures**

| 5.1 Extinguishing media                  |   |
|--|---|
| Suitable extinguishing media             | : Use dry chemical, CO <sub>2</sub> , alcohol-resistant foam or water spray (fog).                                  |
| Unsuitable extinguishing media           | : Do not use water jet.   |
| 5.2 Special hazards arising              | from the substance or mixture   |
| Hazards from the substance or mixture    | : In a fire or if heated, a pressure increase will occur and the container may burst.                               |
| Hazardous thermal decomposition products | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>sulfur oxides |

Q8 Halley 46

## **SECTION 5: Firefighting measures**

| 5.3 Advice for firefighters                       |   |
|---|---|
| Special protective actions for fire-fighters      | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.   |
| Special protective<br>equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents. |

## **SECTION 6: Accidental release measures**

| 6.1 Personal precautions, p     | orote | ctive equipment and emergency procedures   |
|---------------------------------|-------|--|
| For non-emergency<br>personnel  | :     | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Put on appropriate<br>personal protective equipment.   |
| For emergency responder         | rs:   | If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
| 6.2 Environmental precautions   | :     | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).  |
| 6.3 Methods and materials       | for c | ontainment and cleaning up   |
| Small spill                     | :     | Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.  |
| Large spill                     | :     | Stop leak if without risk. Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. |
| 6.4 Reference to other sections | :     | See Section 1 for emergency contact information.<br>See Section 8 for information on appropriate personal protective equipment.<br>See Section 13 for additional waste treatment information.  |

## **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 7.1 Precautions for safe handling

| Protective measures                    | : Put on appropriate personal protective equipment (see Section 8).   |
|--|---|
| Advice on general occupational hygiene | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures. |

#### 7.2 Conditions for safe storage, including any incompatibilities

4/13

Q8 Halley 46

### SECTION 7: Handling and storage

Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

#### 7.3 Specific end use(s) **Recommendations** : Not available. Industrial sector specific

solutions

### : Not available.

## SECTION 8: Exposure controls/personal protection

The information in this section contains generic advice and guidance. Information is provided based on typical anticipated uses of the product. Additional measures might be required for bulk handling or other uses that could significantly increase worker exposure or environmental releases.

#### 8.1 Control parameters

#### **Occupational exposure limits**

| Product/ingredient name  | Exposure limit values   |
|--|---|
| Distillates (petroleum), solvent-dewaxed heavy<br>paraffinic<br>Distillates (petroleum), solvent-dewaxed heavy<br>paraffinic   | Lijst Grenswaarden / Valeurs Limites (Belgium, 11/2011).<br>TWA: 5 mg/m <sup>3</sup> 8 hours. Reference should be made to monitoring standards, such as<br>suropean Standard EN 689 (Workplace atmospheres - Guidance for<br>t of exposure by inhalation to chemical agents for comparison with<br>measurement strategy) European Standard EN 14042 (Workplace<br>Guide for the application and use of procedures for the assessment<br>chemical and biological agents) European Standard EN 482<br>nospheres - General requirements for the performance of procedures<br>ement of chemical agents) Reference to national guidance<br>methods for the determination of hazardous substances will also be |

#### **DNELs/DMELs**

No DNELs/DMELs available.

#### **PNECs**

No PNECs available.

8.2 Exposure controls : Good general ventilation should be sufficient to control worker exposure to airborne Appropriate engineering contaminants. controls Individual protection measures : Wash hands, forearms and face thoroughly after handling chemical products. **Hygiene measures** before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and

safety showers are close to the workstation location.

Q8 Halley 46

### **SECTION 8: Exposure controls/personal protection**

| •                               |   |
|---------------------------------|---|
| Eye/face protection             | : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.   |
| Skin protection                 |   |
| Hand protection                 | : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Wear suitable gloves tested to EN374. Recommended: Nitrile gloves.  |
| Body protection                 | <ul> <li>Personal protective equipment for the body should be selected based on the task<br/>being performed and the risks involved and should be approved by a specialist<br/>before handling this product.</li> </ul>   |
| Other skin protection           | <ul> <li>Appropriate footwear and any additional skin protection measures should be<br/>selected based on the task being performed and the risks involved and should be<br/>approved by a specialist before handling this product.</li> </ul>   |
| Respiratory protection          | : Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. Recommended: Boiling point > 65 °C: A1; Boiling point < 65 °C: AX1; Hot material: A1P2. |
| Environmental exposure controls | : Emissions from ventilation or work process equipment should be checked to<br>ensure they comply with the requirements of environmental protection legislation.<br>In some cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.   |

**12.6 Other adverse effects** : No known significant effects or critical hazards.

Q8 Halley 46

## **SECTION 13: Disposal considerations**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 13.1 Waste treatment methods

| <u>Product</u>      |  |
|---------------------|--|
| Methods of disposal | : The generation of waste should be avoided or minimized wherever possible.<br>Disposal of this product, solutions and any by-products should at all times comply<br>with the requirements of environmental protection and waste disposal legislation<br>and any regional local authority requirements. Dispose of surplus and non-<br>recyclable products via a licensed waste disposal contractor. Waste should not be<br>disposed of untreated to the sewer unless fully compliant with the requirements of<br>all authorities with jurisdiction. |
| Hazardous waste     | : Yes.   |

### European waste catalogue (EWC)

| Waste code          | Waste designation   |  |
|---------------------|---|--|
| 13 01 10*           | mineral based non-chlorinated hydraulic oils  |  |
| Packaging           |   |  |
| Methods of disposal | <ul> <li>The generation of waste should be avoided or minimized wherever possible. Waste<br/>packaging should be recycled. Incineration or landfill should only be considered<br/>when recycling is not feasible.</li> </ul>              |  |
| Special precautions | This material and its container must be disposed of in a safe way. Empty containers<br>or liners may retain some product residues. Avoid dispersal of spilled material and<br>runoff and contact with soil, waterways, drains and sewers. |  |

## **SECTION 14: Transport information**

|                                    |                |                | 1              | 1              |
